Scoreboard

How digital are we?
Citizen as **consumer**

Encourage cross-border e-commerce uptake

*9% of citizen ordered in other country – compared to 40% in own country*
Avoid consumer lock-in through standards:
Public procurement to specify applicable standard instead of product/vendor

Avoid fragmentation to create a Digital Agenda Single market
National interoperability framework

www.agoria.be
E-Government for citizens:
Crossborder reduction of administration
Cost-effective route to better services
Open and transparent government
EiD (electronic identity card) mutual recognition
Specific groups actions and **pilots**:  
EU elderly citizens  
Accessibility  
Health
HOW ARE CITIZENS ACTUALLY TAKING ADVANTAGE OF THE DIGITAL AGENDA ‘DIVIDEND’?
How will people use their phones in the future?

We asked people which features or apps they are not using today, but would be interested in using in the future.

Select a country circle below for more information.

Levels of interest: Low | High
How will people use their phones in the future?

We asked people which features or apps they are not using today, but would be interested in using in the future.
E-citizen: green energy registrar (subsidies locator,...)
Active e-citizen: damage road/hazard reports (fix my street)
Active e-citizen: solving problems together (crowd)

On Challenge.gov, the public and government can solve problems together.

About AGORIA

> In 2009 Agoria brought together major players in the GEO-ICT field
> From this roundtable it seemed that there is enough basis for a private sector representation.
> Attention points
  > Re-use of geo-information and discussion about the juridical frame
  > Inform public authorities of available technologies
  > Construct strategic dialogue with authorities (e.g. GDI Raad Flanders)
  > Seek better partnership public-private-education
  > Image and attractiveness of sector
