Displacement by Day

Reasons for Movement:

Insecurity: 150
Drought: 330
Lack Of Livelihood: 80
Flood: 0
Conflict: 0
IDP Return: 40
Fires: 0
Forced Return: 380
Eviction: 0
Reintegration: 0

Monthly Highlights

Areas Receiving IDPs
Source of Data

These figures are estimates derived from ASG
Population Movement Tracking (PMT) System. They are intended to show population movement trends, not cumulative
IDP population data. Due to the fluid nature of
displacement in Somalia and in order to avoid
capturing multiple displacements, these
figures should therefore not be added and
used cumulatively.

The legacy of the world’s conflicts can be seen in the scores of camps for refugees around the world. This story profiles the 50 most populous settlements administered by the United Nations High Commission for Refugees. Contrary to popular belief, many of these settlements are far from temporary, and most of the largest ones are in Africa and South Asia. In total, these camps are home to over 15 million uprooted people. The massive Dadaab complex in Kenya (which includes the Hagadera, Dagahaley, and Ifo camps) has existed for years, even decades. As this imagery in these views shows, many refugee settlements are located on arid or marginal lands. With scarce local resources from which to draw, most residents of these facilities depend on external aid for survival.

Explore Refugee Camps
Fifty Most Populous Refugee Camps

The United Nations High Commissioner for Refugees administers camps sheltering a vast population of displaced people. These largest camps together house nearly two million people.

Ifo 2 West
Kenya
Rank: 3
The residents of Ifo 2 West are primarily from Somalia.
Image was made prior to the camp's establishment.
This camp's population is comparable in size to Springfield, Illinois.
UPDATE: AL ZAATARI REFUGEE CAMP, MAFRAQ GOVERNORATE, JORDAN

Map Analysis with WorldView-2 Data Acquired 7 January 2014 and WorldView-1 Data Acquired 30 September 2013

This map illustrates satellite-detected shelters and other buildings at the Al Zaatari refugee camp in Mafraq Governorate, Jordan. As of 7 January 2014, a total of 8,763 shelters were detected as well as 4,725 infrastructure and camp buildings within the limits of the camp. Between 30 September 2013 and 7 January 2014, a total of 4,661 new shelters were added, and a total of 5,896 shelters were completed, bringing the total number of shelters to approximately 14,659, almost double the estimated UNHCR assessment of 8,000 shelters. This indicates an approximately 8.8% increase in the number of shelters between 30 September 2013 and 7 January 2014. This is a preliminary analysis and has not yet been validated by the UNHCR. Additional buildings subject to spatial error margins of ±5-10 meters. Please send ground feedback to UNITAR/UNOSAT.
