

VIDA

**We build the operating
system for impact risk
management and reporting**

The global infrastructure market has a big problem: **managing & reporting climate & ESG risks**

Climate change significantly
increases
investment risks

Reporting is a
headache
(e.g. SFDR)

Shareholders and
customers want
transparency

ESG regulations
are getting
tougher

For **thousands of market participants**

>3,500

Infrastructure funds

>2,000

green bonds p.a.

>450

development banks &
institutions

>100,000

Other market
participants

VIDA makes ESG & climate risk management **easy**

Easy to use **map view**

Assess several **climate risk data** of anywhere in world

Real time monitoring of individual assets and portfolios

Automated **reportings**

Collaboration with global teams, consultants and partners

Already used by **standard setting customers**

VIDA's simple, **intuitive software** can be used by non-specialists

Key features

01 De-risk

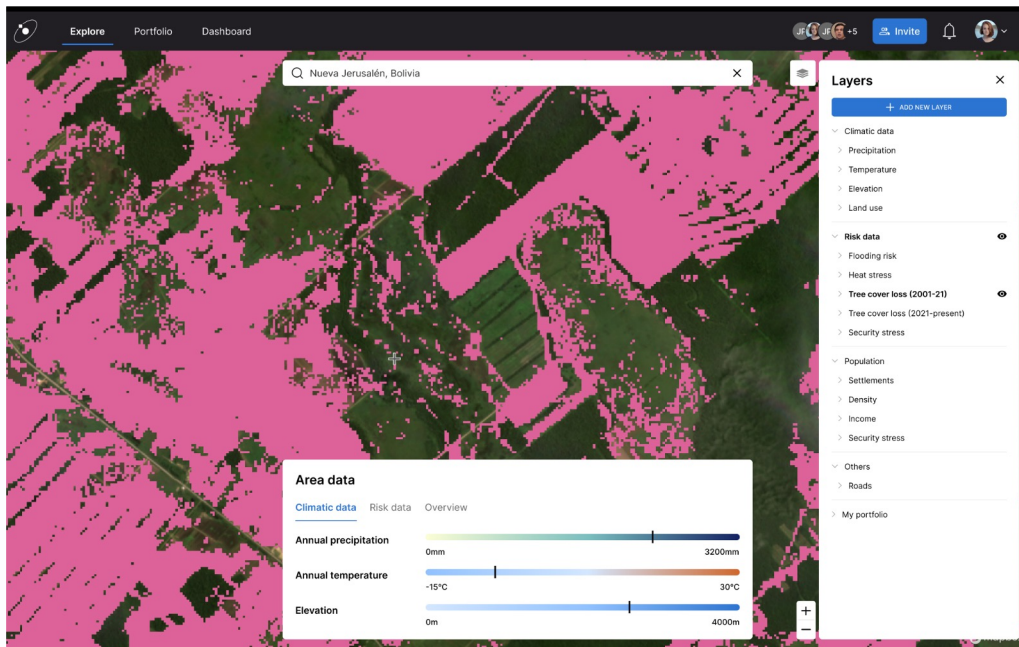

Explore 100s of geospatial data layers to identify any climate and ESG risks before investing.

02 Manage Portfolio

Bring in impact data from you and your stakeholders

03 Report & monitor

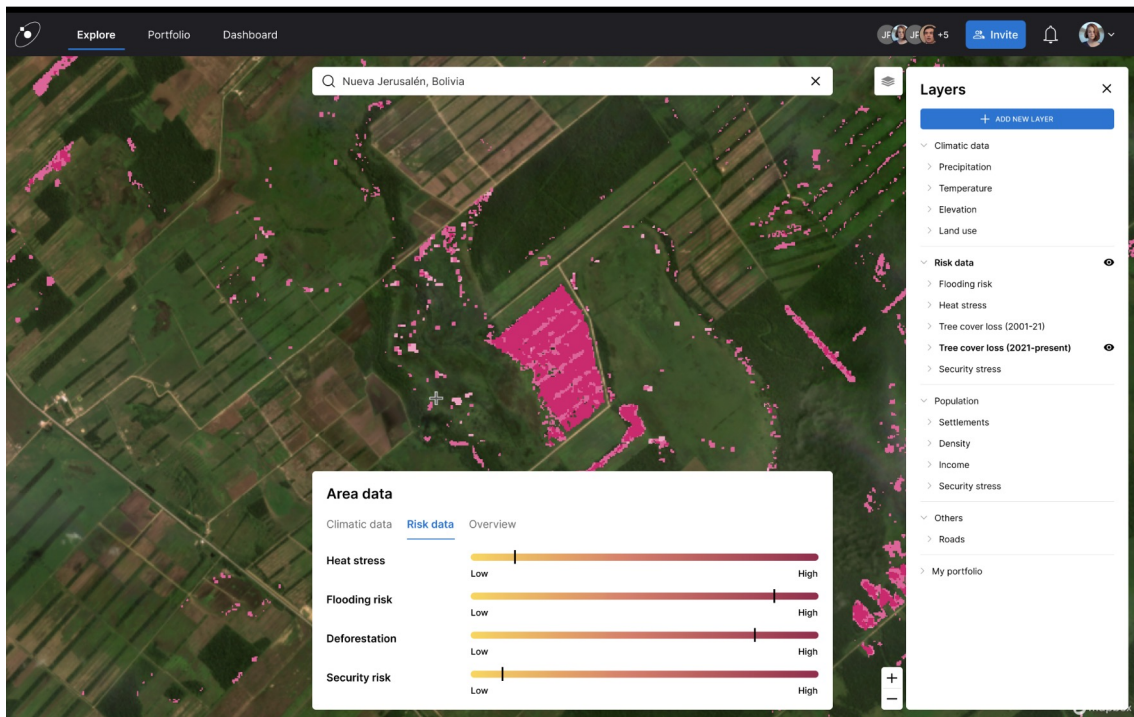

More impact, better decisions, automated reporting & lower risk

EXPLORE & DE-RISK

VIDA provides global climate and ESG risk data layers.

Explore potential investment sites risks and complete your ESG and climate due-diligence in VIDA.

MANAGE PORTFOLIO

Manage the impact created from invested sites using VIDA. Invite internal team and investee to collaborate and collect impact data at a regular interval.

Access 100s of data layers to validate impact data

The image displays two overlapping screenshots of the VIDA dashboard. The background screenshot shows the 'Portfolio' view for 'Bolivia apex farm' with various impact metrics. The foreground screenshot shows a modal for inviting team members to the site.

Bolivia apex farm
Nueva Jerusalem, Bolivia
