

# Geospatial Frameworks

## Building Effective Geospatial Infrastructure

**Deirdre Dalpiaz Bishop**  
Chief, Geography Division  
U.S. Census Bureau

# Geospatial Frameworks

## Guiding the Development of National Geospatial Infrastructure

# Integrated Geospatial Information Framework

- IGIF is globally developed and endorsed by the UN-GGIM Committee of Experts
- Helps countries to integrate information about people and their geography
- Enables effective policy formulation, decision-making, and innovation
- Strengthens geospatial information management and related infrastructure
- IGIF helps deliver sustainable social, economic, and environmental development – leaving no one behind

# Integrated Geospatial Information Framework

## Strengthening National Geospatial Infrastructure

# Integrated Geospatial Information Framework

Helping the U.S. Build and Strengthen National Geospatial Infrastructure
