We’re focused on one thing. To provide the best possible understanding of our planet. Leading the way, enabling organizations to make the right decisions, at the right time.
By using local drone operators we supply high-quality data, on demand. All through one single platform.

Delivered in "real-time", in a cost efficient and environmentally friendly way.

The world's first and largest drone data marketplace

8000+ operators in 134 countries
How it works

Solving data collection complexity with full transparency through our automated platform and marketplace. Easy. Just as it should be.

**Order data**
01
Select geographic zone, data product(s), and other industry-specific parameters.

**Operator match**
02
Matched instantly against local operators collecting the data.

**Data delivery**
03
Completed data sets accessed immediately, or through our API.
