Connected Urban Twins - Digital Twins for Integrated Urban Development

# Foundation for Urban Digital Twins:

Michael Fischer

Hamburg

# The CUT project at a glance

The Partner Cities:

Funded by:

<b>3</b> partner cities Hamburg, Leipzig and Munich	<b>70</b> specialists in our project team	<b>73</b> Model projects smart cities (MPSC) in our network
<b>5</b> years project duration from January 2021 to December 2025	<b>32,4</b> million euros project volume	<b>BMWSB</b> Funding: Federal Ministry for Housing, Urban Development and Building

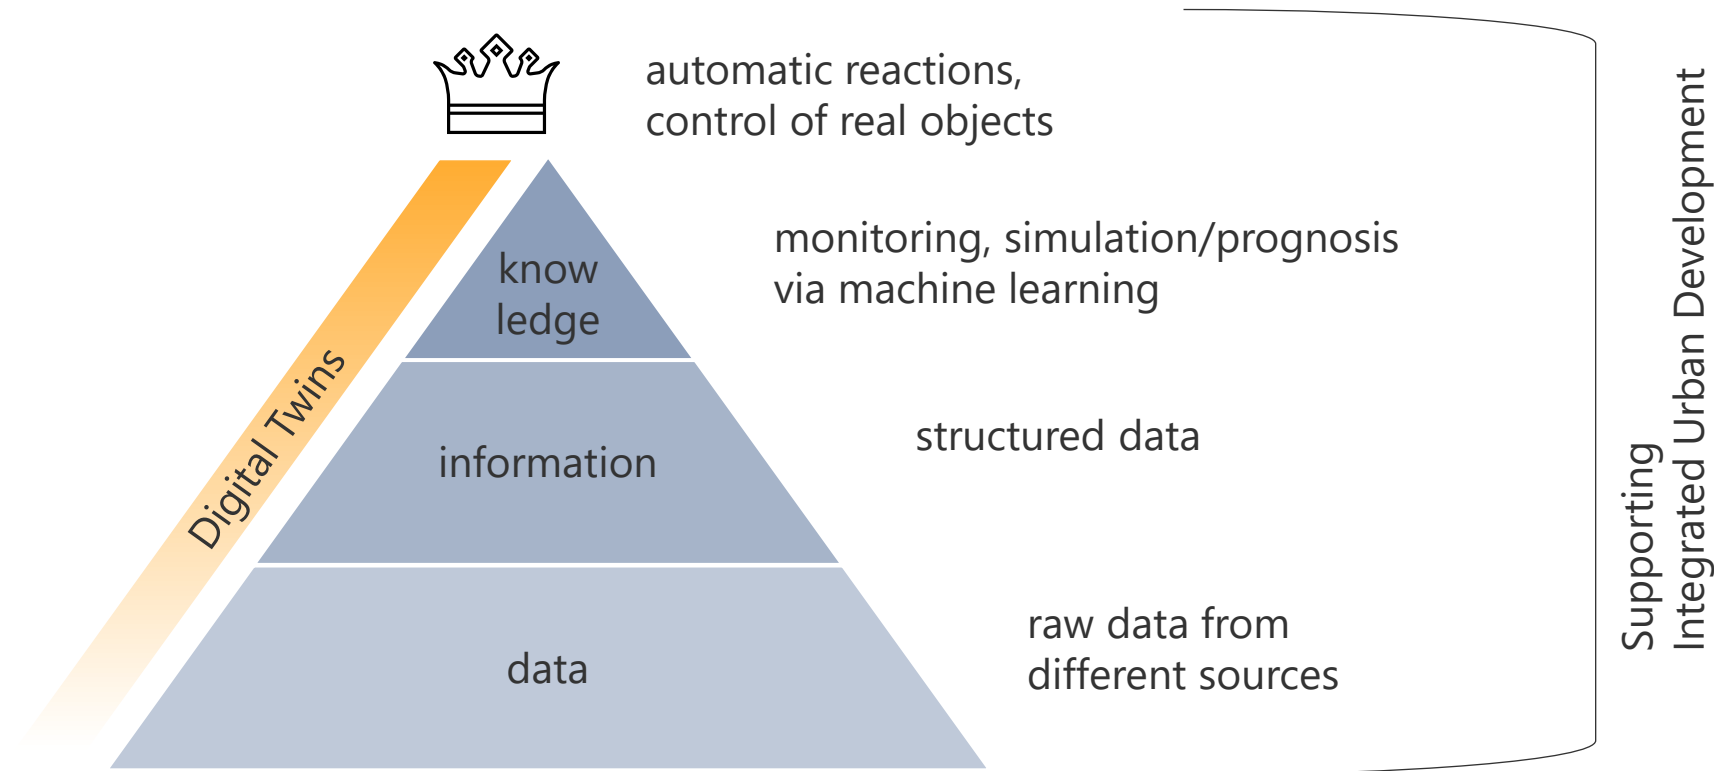

- Use Urban Digital Twins to gain a better understanding of complex urban development contexts, make more informed decisions.
- Innovative digital tools and formats help facilitate democratic participation.
- Set standards for the concept of Urban Digital Twins and data governance.
- Providing standardized technical building blocks, facilitate the subsequent use and independent further development in other cities

# What are Urban Digital Twins?

## From data to information and knowledge to control

# Conceptual approach Urban Digital Twin

## Digital resources of a city

## Urban Digital Twins

- Geo base data
- Specialised data
- Analysis
- Applications
- Geo base twin

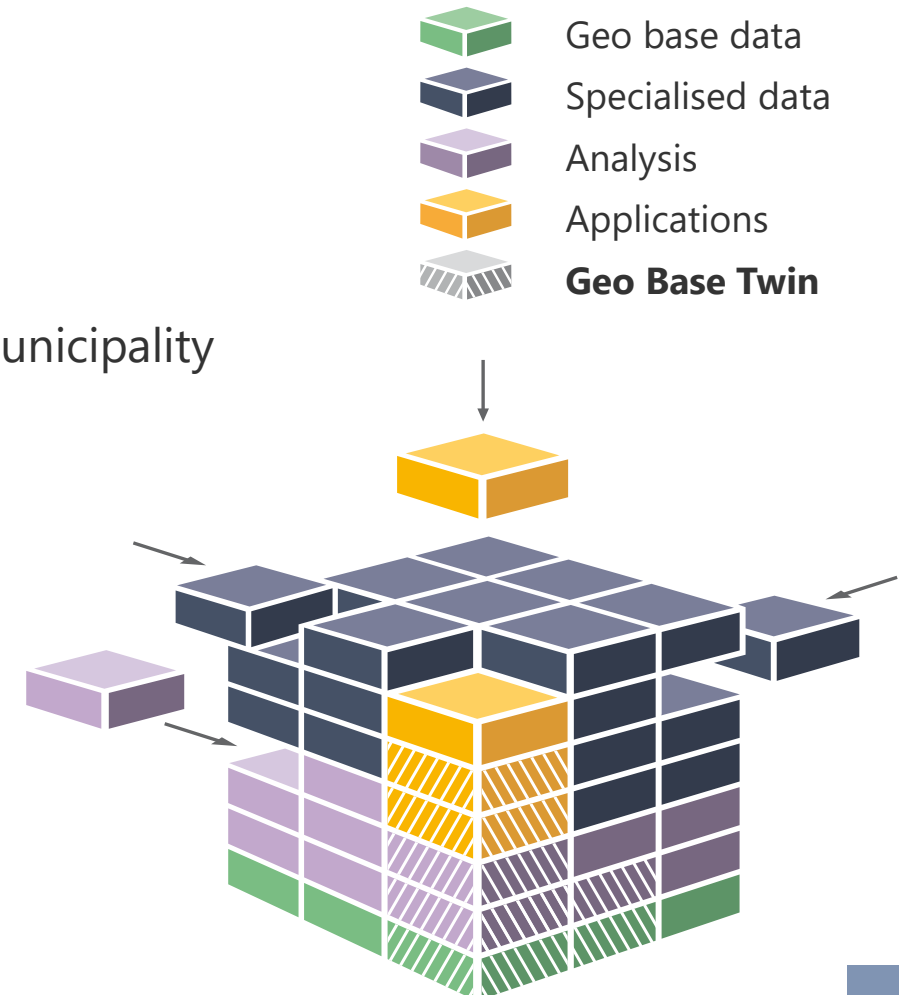

Concept for the organization and utilization of urban data, its physical components and logical structures as well as the actors involved and their processes

– i.e. all digital resources of a city

Consideration of technical, organizational and legal aspects

- **Essential basis** of Urban Digital Twins of a data-sovereign city: Urban geographic base data
- **Geo base data...**
  - ... define the spatial reference
  - ... enable consistent, cross-disciplinary information linkage
  - ... form a unified interpretive space
- **Geo Base Twin** as an essential basis for digital twins of a city/municipality

Composition of fundamental component:  
**Geo Base Twin**

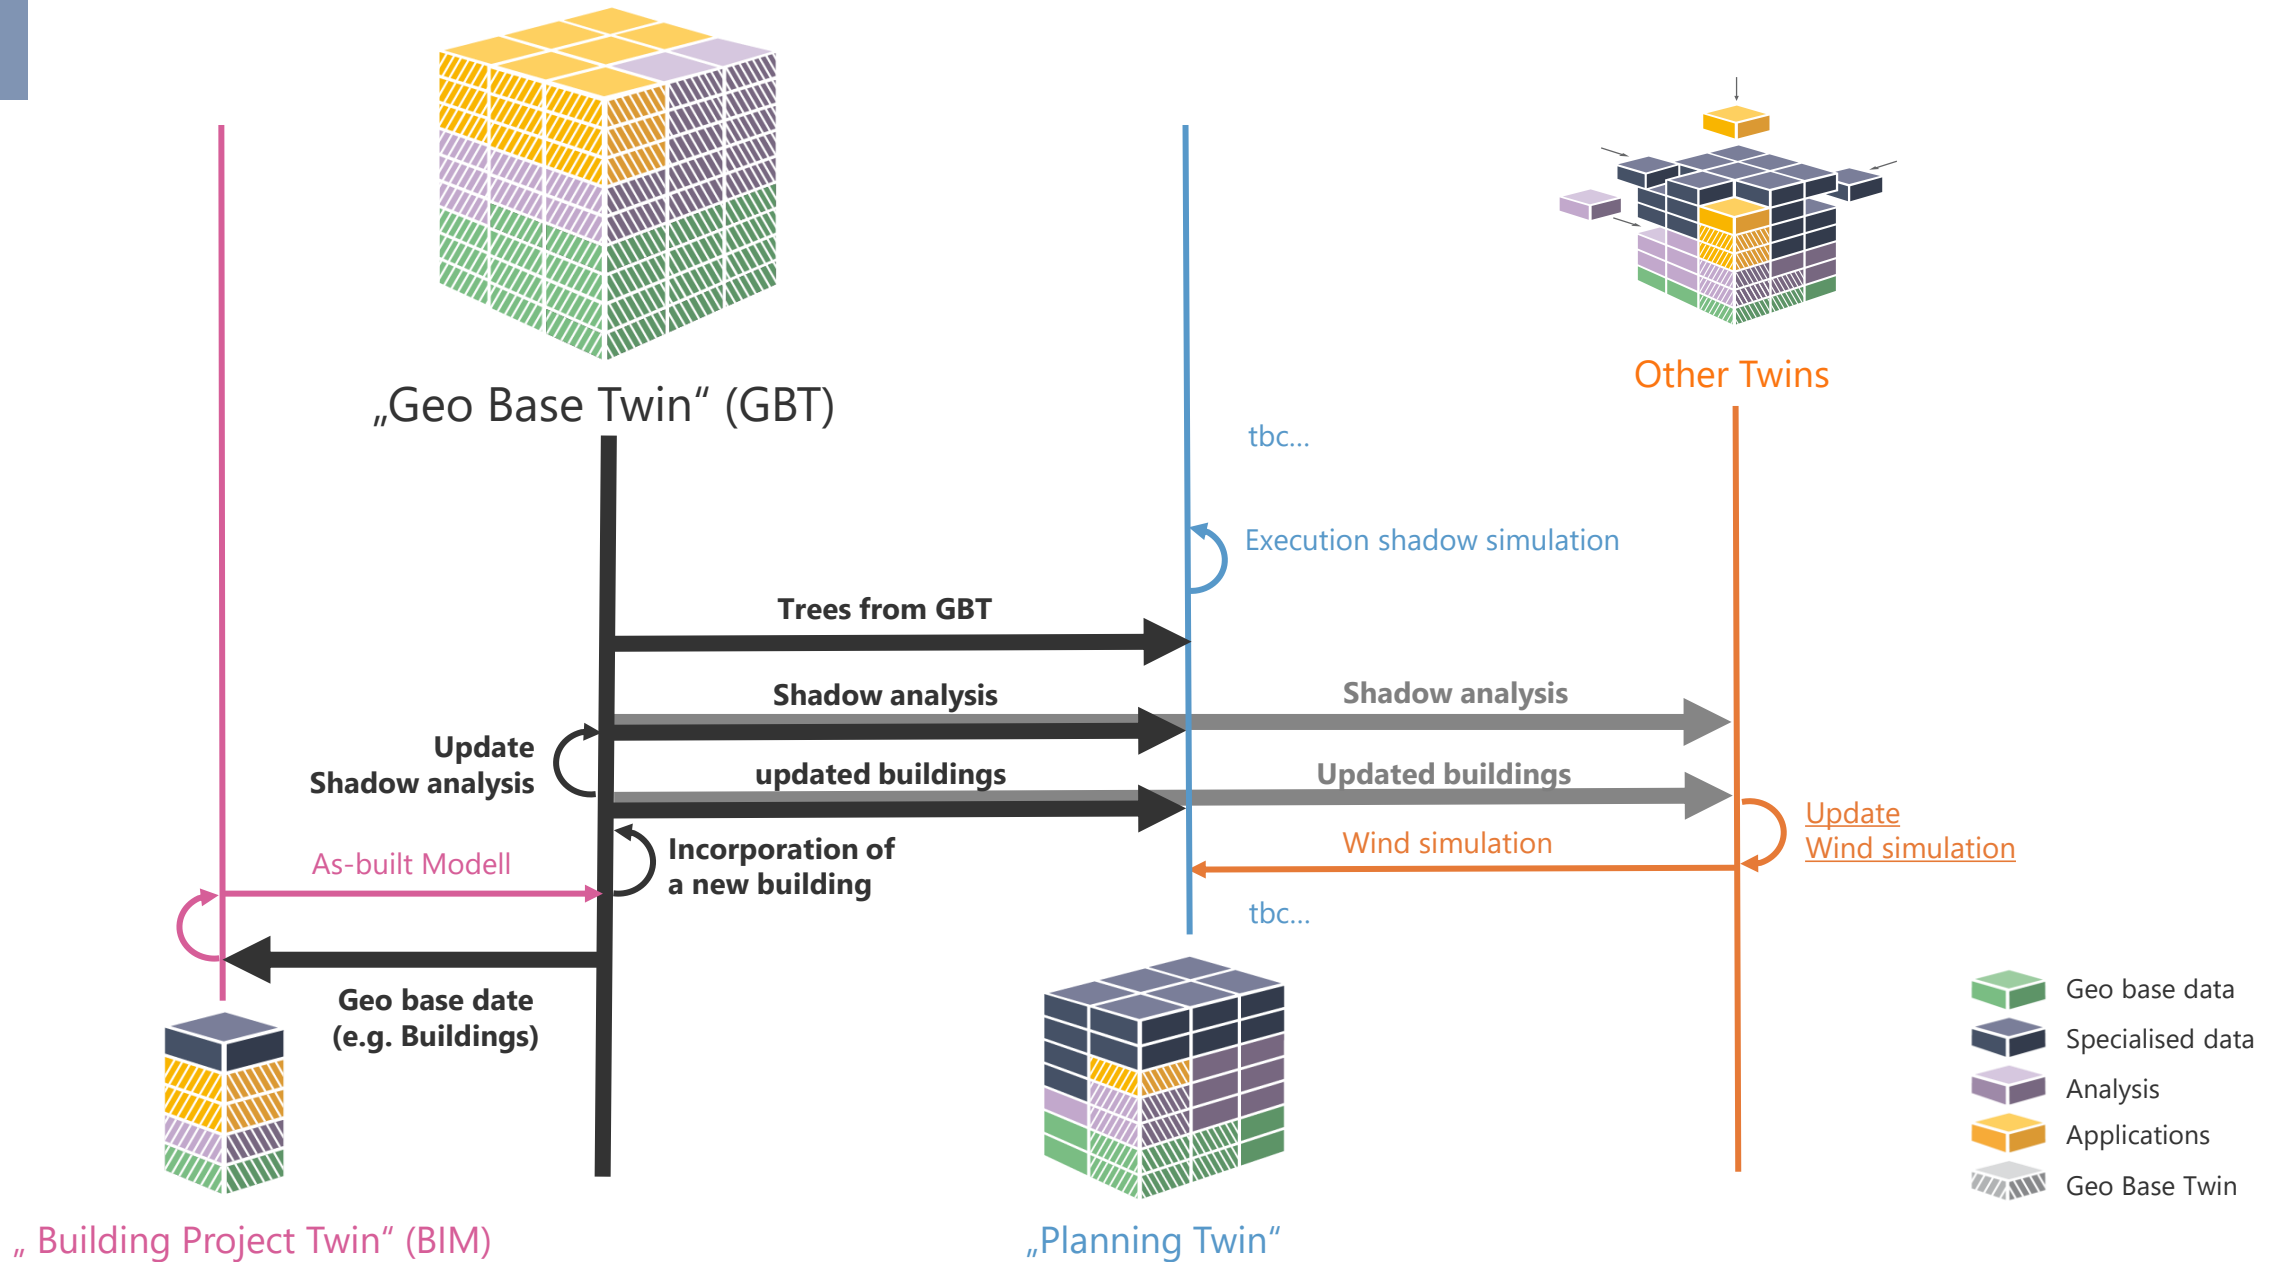

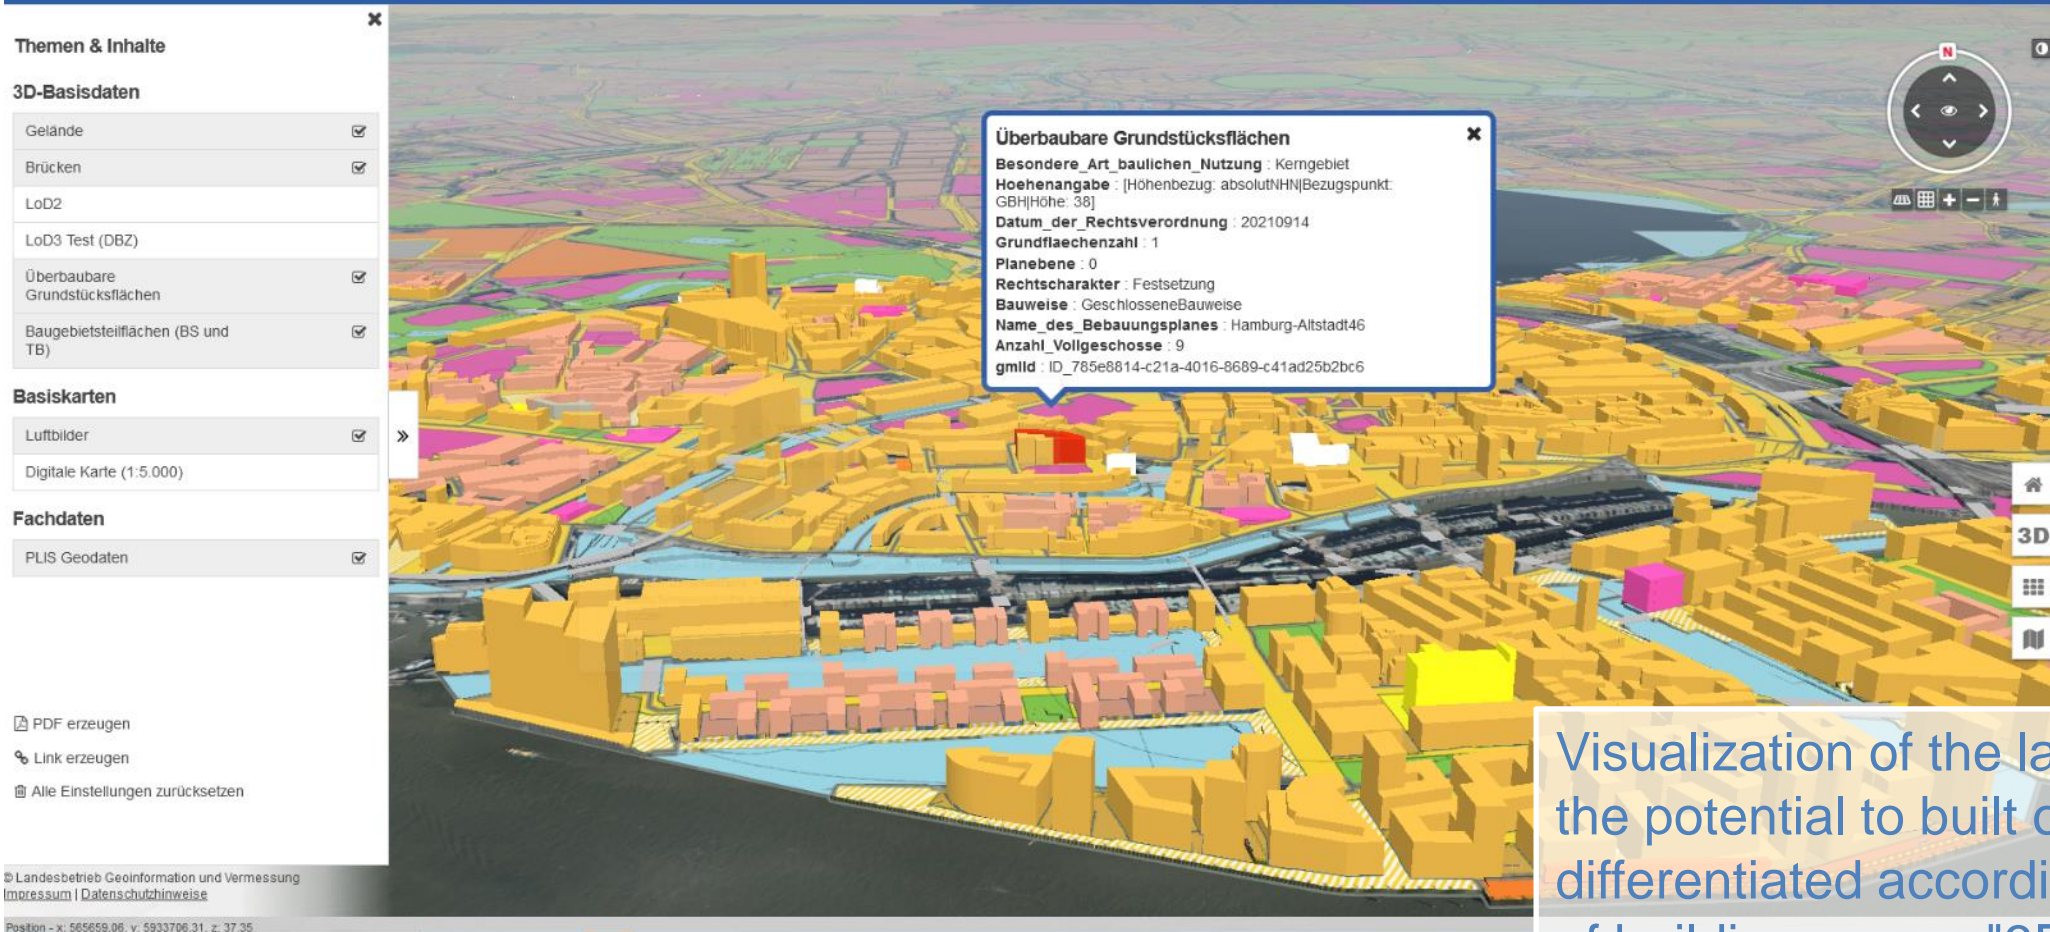

# Examples

Interaction of Urban Digital Twins

# Example

**Themen & Inhalte**

**3D-Basisdaten**

- Gelände
- Brücken
- LoD2
- LoD3 Test (DBZ)
- Überbaubare Grundstücksflächen
- Baugebietsteiflächen (BS und TB)

**Basiskarten**

- Luftbilder
- Digitale Karte (1:5.000)

**Fachdaten**

- PLIS Geodaten

Position - x: 565659.06, y: 5933706.31, z: 37.35

**Überbaubare Grundstücksflächen**

- Besondere\_Art\_baulichen\_Nutzung: Kerngebiet
- Hoehenangabe: [Höhenbezug: absolutNNH|Bezugspunkt: GBH|Höhe: 38]
- Datum\_der\_Rechtsverordnung: 20210914
- Grundflaechezahl: 1
- Planebene: 0
- Rechtscharakter: Festsetzung
- Bauweise: GeschlosseneBauweise
- Name\_des\_Bebauungsplanes: Hamburg-Altstadt46
- Anzahl\_Vollgeschosse: 9
- gmild: ID\_785e8814-c21a-4016-8689-c41ad25b2bc6

3D

Visualization of the land areas with the potential to built over, differentiated according to the type of building use as "3D Planning law framework".

# Urban Data Story: Intersection of the twins (planned/built)

View together the twins of the built and planned city to identify non- or underutilized building zoning law. In the example, the height of a building designated by building planning law is not utilized

# Sharing Mobility Dashboard as digital twin

## Analysis

- Hotspot
- Aggregation
- ...

## Basic spatial information

- Basemaps
- Boundaries
- ...

## Data

- Up to date data of positions
- No parking zones
- ...

-  Geo base data
-  Specialised data
-  Analysis
-  Applications
-  **Geo Base Twin**

## E-Scooter provider

- Provide position data
- Alter their fleet management

## Basis for decisions:

- Number of scooters per district
- Use hotspots
- Number of parking violations

Thank you  
for your attention!
