# GeoIntelligence and the Changing Security Landscape

Geospatial World Forum - Defense and Intelligence Summit

Brigadier-General Friedrich TEICHMANN

15 May 2024

EINSATZBEREIT FÜR ÖSTERREICH  
BUNDESHEER.AT

# Challenges 1

- ▼ Speed and timing
- ▼ Quality and “Pareto Principle” 80/20
- ▼ Big Data and AI
- ▼ Digitalisation – M2M (machine to machine)
- ▼ „Strategic – Operational – Tactical“: differentiation is blurred
- ▼ Optimal use of Space Services
- ▼ Integration UAV (automated vehicles)
- ▼ Handling of classified data (incl dissamination)

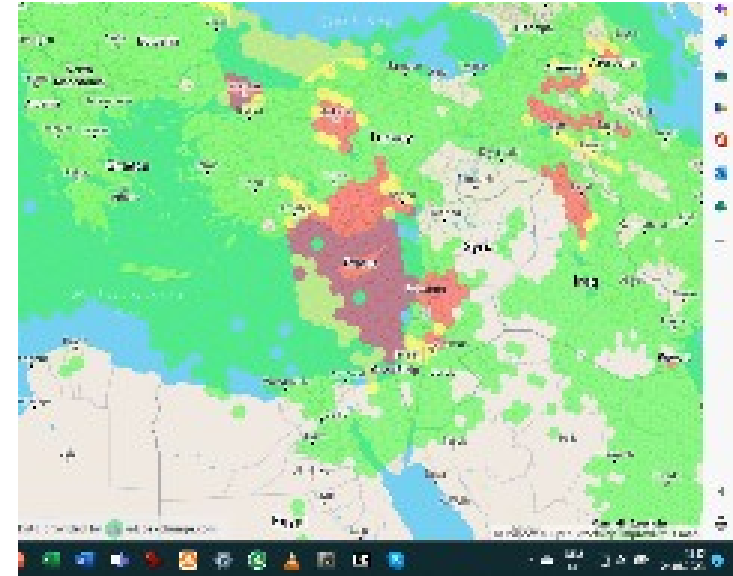

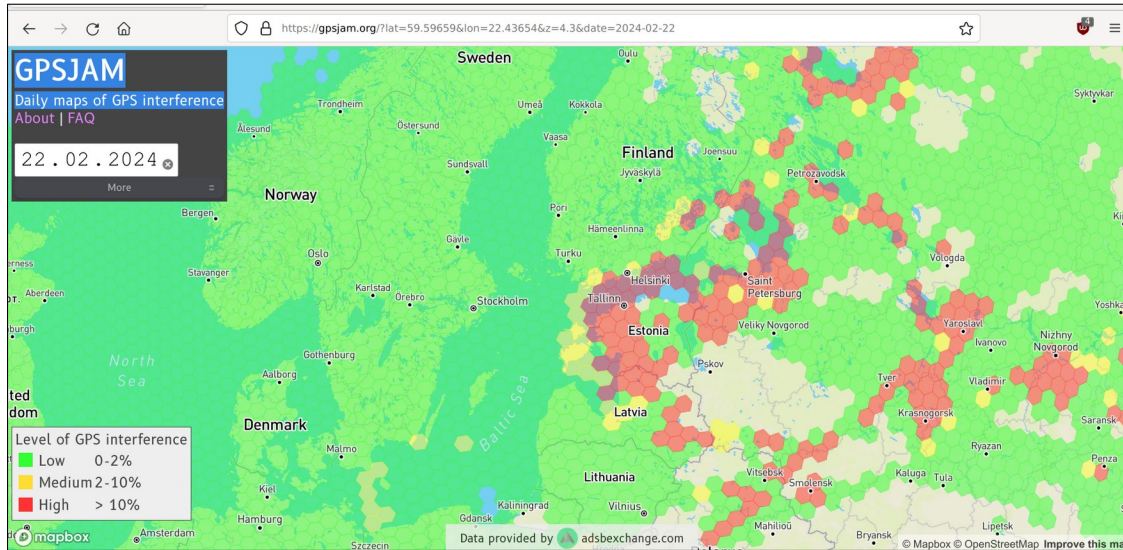

## Challenges 2

- ▼ Speed and timing
- ▼ Quality and “Pareto Principle” 80/20
- ▼ Big Data and AI
- ▼ Digitalisation – M2M (machine to machine)
- ▼ „Strategic – Operational – Tactical“: differentiation is blurred
- ▼ **Optimal use of Space Services**
- ▼ **Integration UAV (automated vehicles)**
- ▼ Handling of classified data (incl dissamination)

# Satellite-Navigation

- Secure PNT (Position-Navigation-Timing)
- Navigation Warfare (offensive and defensive)

# Space-Based Earth Observation

- ▶ UAV/drones versus Satellite
- ▶ 4 resolutions (SBE0)

# New Space (Space 2.0) and UAV

## ◀ SWOT

- Strength (options, control)
- Weakness (complexity)
- Opportunities (worldwide, “low regulation”)
- Threats (SDA, SLA)

## ◀ Competing Technology (e.g. UAV)

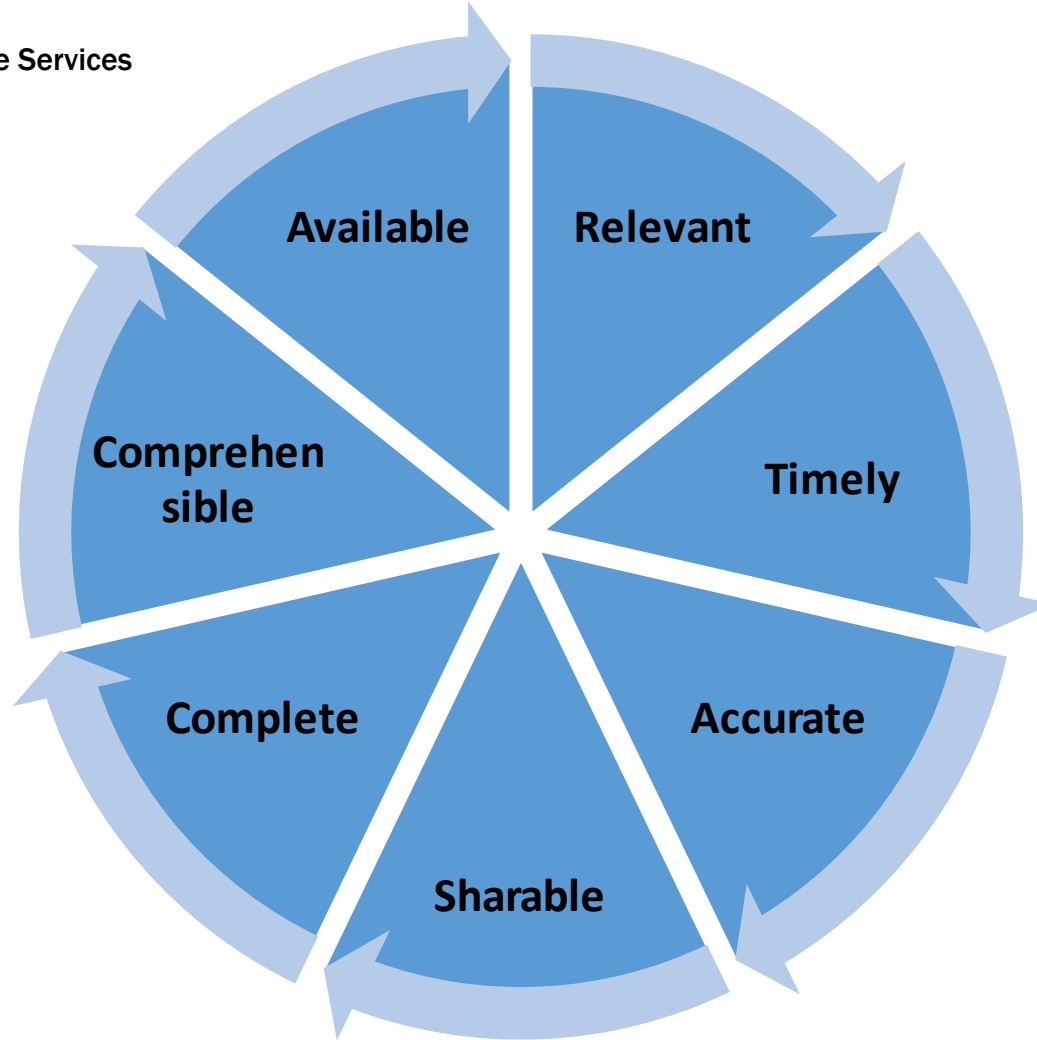

## Challenges 3

- ▼ Speed and timing
- ▼ Quality and “Pareto Principle” 80/20
- ▼ **Big Data and AI**
- ▼ **Digitalisation – M2M (machine to machine)**
- ▼ **„Strategic – Operational – Tactical“: differentiation is blurred**
- ▼ Optimal use of Space Services
- ▼ Integration UAV (automated vehicles)
- ▼ Handling of classified data (incl dissamination)
