The National Mapping Agency's role in Image Intelligence

Juliet Ezechie, Director, International, Ordnance Survey

16 May 2024

Our network of over 110 continuously operating permanent GNSS receivers provide the bedrock for enabling downstream space users

Combining foundational geospatial data with earth observation data gives an additional dimension to data analysis.

Finding the right partners is key to success – don't 'float' off by yourself.

Survey

SEE > BETTER PLACE

Collaborating with the National Centre for Earth Observation, OS provided meaningful insights for policy-makers to manage the impacts of climate change in hot spots.

Prof John Remedios

Director, NCEO

National Centre for Earth Observation
