THINKING WINES

PEDRO BAPTISTA

Active proximal sensing on vineyard vigor vegetation management

TERROIR

There are unique aspects of a specific place that shape grape quality

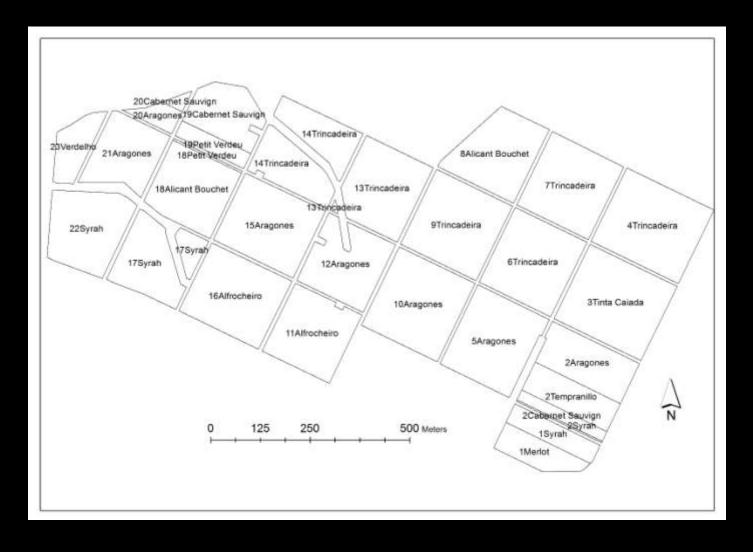

TERROIR

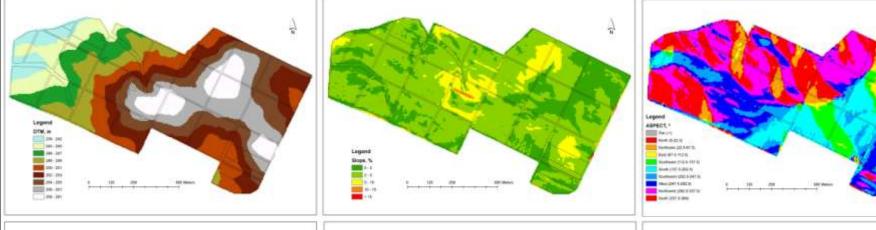

Topography; Soil; Climate; Genetics; Plant population; age; management... ...plant temporal tensions integration during a vegetative cycle

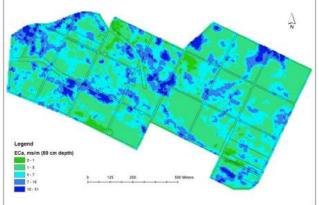

TERROIR

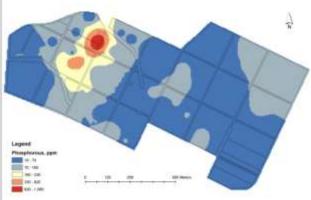

YES It's a very complex multi-factorial phenomenen

"WINE - VEGETATION"

- KEY QUESTIONS:
- i) In order to obtain a better productivity/quality relationship how do we manage vegetation on dry and wet years?

"WINE - VEGETATION"

- ii) In wet years, with more soil water availability what should be our strategy:
 - a) reduce vegetation in order to save water and save money; or
 - b) stimulate vegetation in order to exhaust soil water reserves and better control plant water stress, so important to shape quality in the end of the maturity process?

"WINE - VEGETATION"

- iii) In dry years what should be our strategy:
 - a) reduce vegetation in order to save water and Money; or
 - b) improve vegetation to better control productivity and plant water stress?
- iv) Can we model water plant stress in order to shape wine characteristics? Is vegetation important in this modelling process?

"PHREATIC – VEGETATION - WINE"

 v) Nationally there exist wine regions with groundwater water table relatively high, inclusively in summer time, when compared with other regions (e.g.: Palmela region), in this way how do we have to manage vegetation and plant water stress in order to obtain quality?

"SOIL – IRRIGATION - VEGETATION -WINE"

- vi) How to manage all this restrictions:
 - a) enterprise strategy; b) soil; c) phreatic; d) dry year; e) wet year; f) wine characteristics; g) genetics characteristics;...

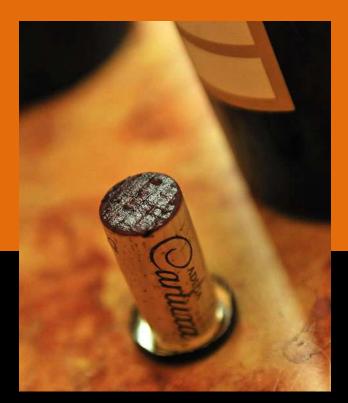

in order to achieve the wine we want?

THERE IS NO UNIQUE SOLUTIONS

"CONCLUSIONS"

- WHAT TYPE OF WINE DO WE WANT?
- WHAT TYPE OF YEAR DO WE HAVE?
- WHAT TYPE OF PRHEATIC EXIST?
- WHAT TYPE OF VEGETATION DO WE HAVE AND WHAT TYPE OF VEGETATION DO WE NEED?
- WHAT TYPE OF WATER STRESS DO WE NEED?
- WHAT TYPE OF WINES FASCINATE US?
