

# Ireland's approach to driving a Spatial Data Infrastructure

Lorraine McNerney, OSi General Manger

*Geospatial World Forum, 27<sup>th</sup> May 2015*

# OSi – The Irish National Mapping Agency

- Size: 70,000 km<sup>2</sup> / Population: 4.6m
- Established in 1824
- Create & maintain the definitive spatial reference information for the State
- Merging of OSi, Valuation Office & Property Registration Authority

# Data Collection Expertise

- Staff activity breakdown
  - 60% in production
  - 12% in field surveying
  - 18% in data and technology management
- Two leased aircraft piloted with OSi crews
- Fully digital workflows (ISO Certification for remote sensing flowlines)

# Data Management Expertise

- Manage 50+ million uniquely referenced features
- Digital data from 1824 - 2015
- Partner approach with key technology vendors
- European reference site for Oracle Spatial and Graph Technologies
- Hybrid Cloud deployment
  - Private Cloud for Production & Supply Data
  - Public Cloud for OSi WebServices

# Our Products & Services

**Updated every 1, 3 and 5 years**

Large Scale Data	Medium Scale Data	Small Scale Data	National Imagery
			
1:1,000, 1:2,500 and 1:5,000 PLACE Maps	1:10-15,000 Digi-City 1:10,000 Digi-Town 1:50,000 Discovery	1:210,000 Holiday 1:450,000 Ireland 1:600,000 Ireland	1m per pixel ortho-photography

**Cities & Towns**

LiDAR Data	City & Town Imagery	Boundary Data	Services
			
Digital Terrain Model Digital Surface Model	25cm per pixel ortho-photography	County ED Townlands Small Area	Online Shop Public Viewer Environmental Reports Web Services

# OSi's Strategic Vision

1. Making the data more usable
  - Standardisation and quality of spatial information.
2. Making the data more accessible
  - On-line access to spatial information.
3. Enabling the integration and sharing of national spatial information
  - Implementation of national portal infrastructure.

# Making the data more usable

**Prime**

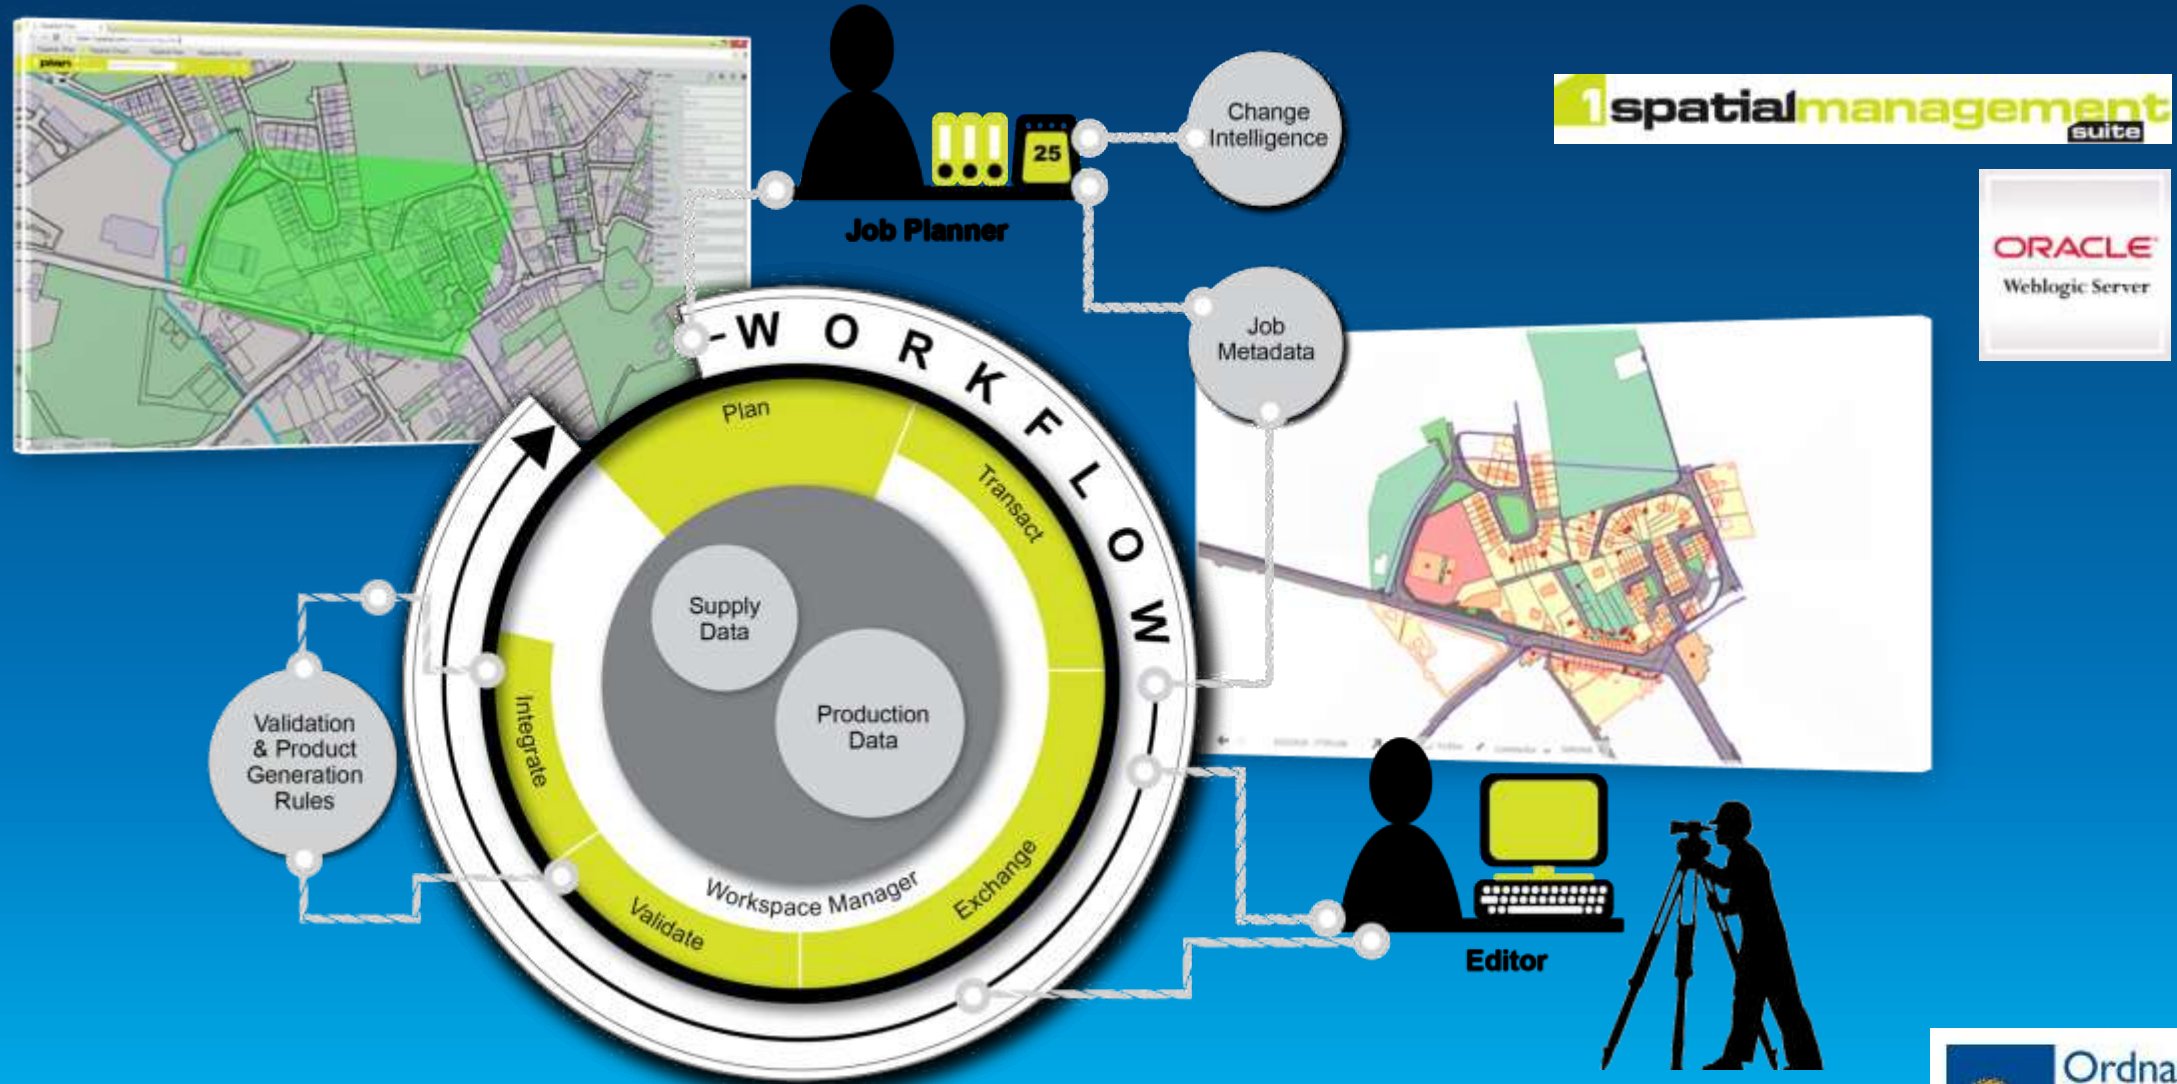

Cartographic      No Attribution  
 Spaghetti Lines    Tile Based

**Prime2**

Real World      Rich Attribution  
 Polygons      Seamless

# Object-based Production Workflow

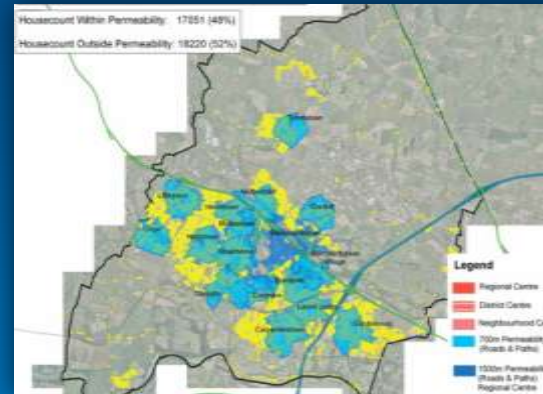

# Prime2 matters to Government and the Citizen

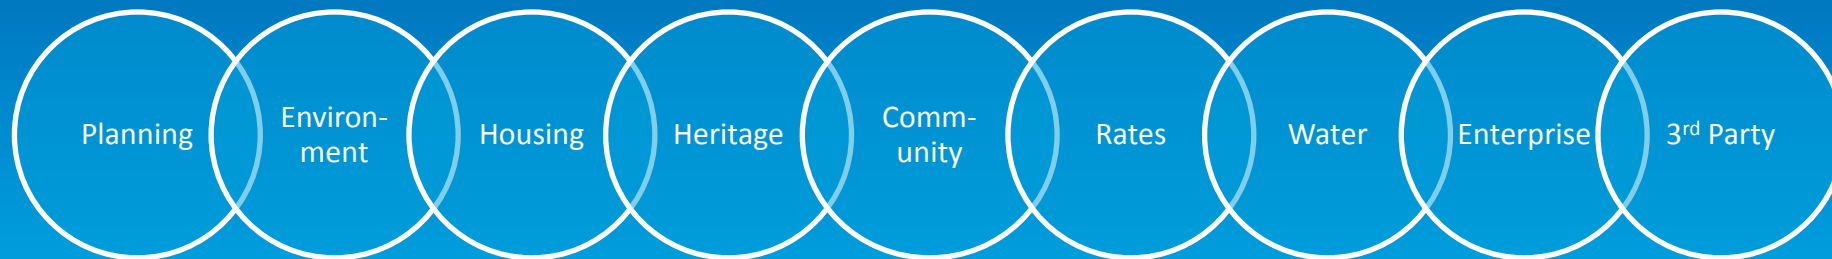

More detail for reporting on EU Directives

## Better Planning

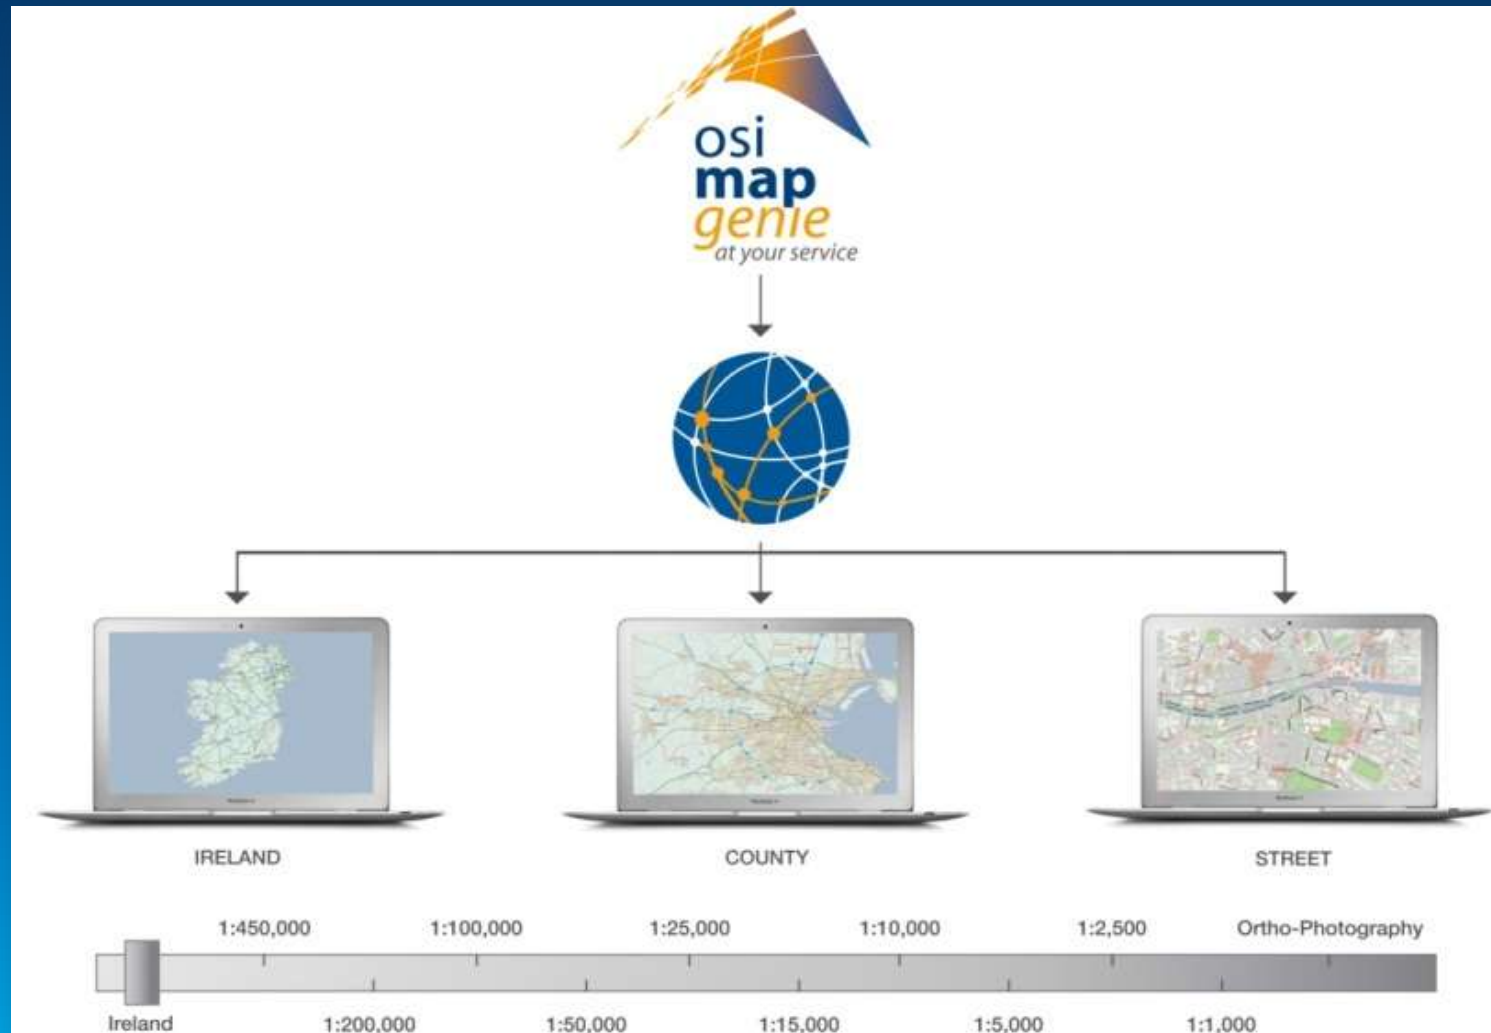

Improved Citizen Services

# Making the data more accessible

# OSi's MapGenie WebService

# Irish Revenue Project using OSi WebServices

The screenshot shows the Revenue Local Property Tax website interface. On the left, there is a 'Local Property Tax' section with a 'Property Valuation Guide' and 'Instructions'. The main area features a map of Dublin with a 'Time Range' overlay showing a line graph of property values from 2013/10 to 2013/11. The graph shows a significant peak in late 2013. The website header includes the Revenue logo and 'Local Property Tax LPT' branding. The footer contains '© Revenue Commissioners' and 'OSi Ordnance Survey Ireland'.

From service request to launch =  
6 weeks

Up to 60m hits per day

Max requests on launch day  
166,000 / per minute

Ireland's most used authoritative  
web mapping service to date

# Integrating and sharing spatial information

# The initial challenge = INSPIRE compliance

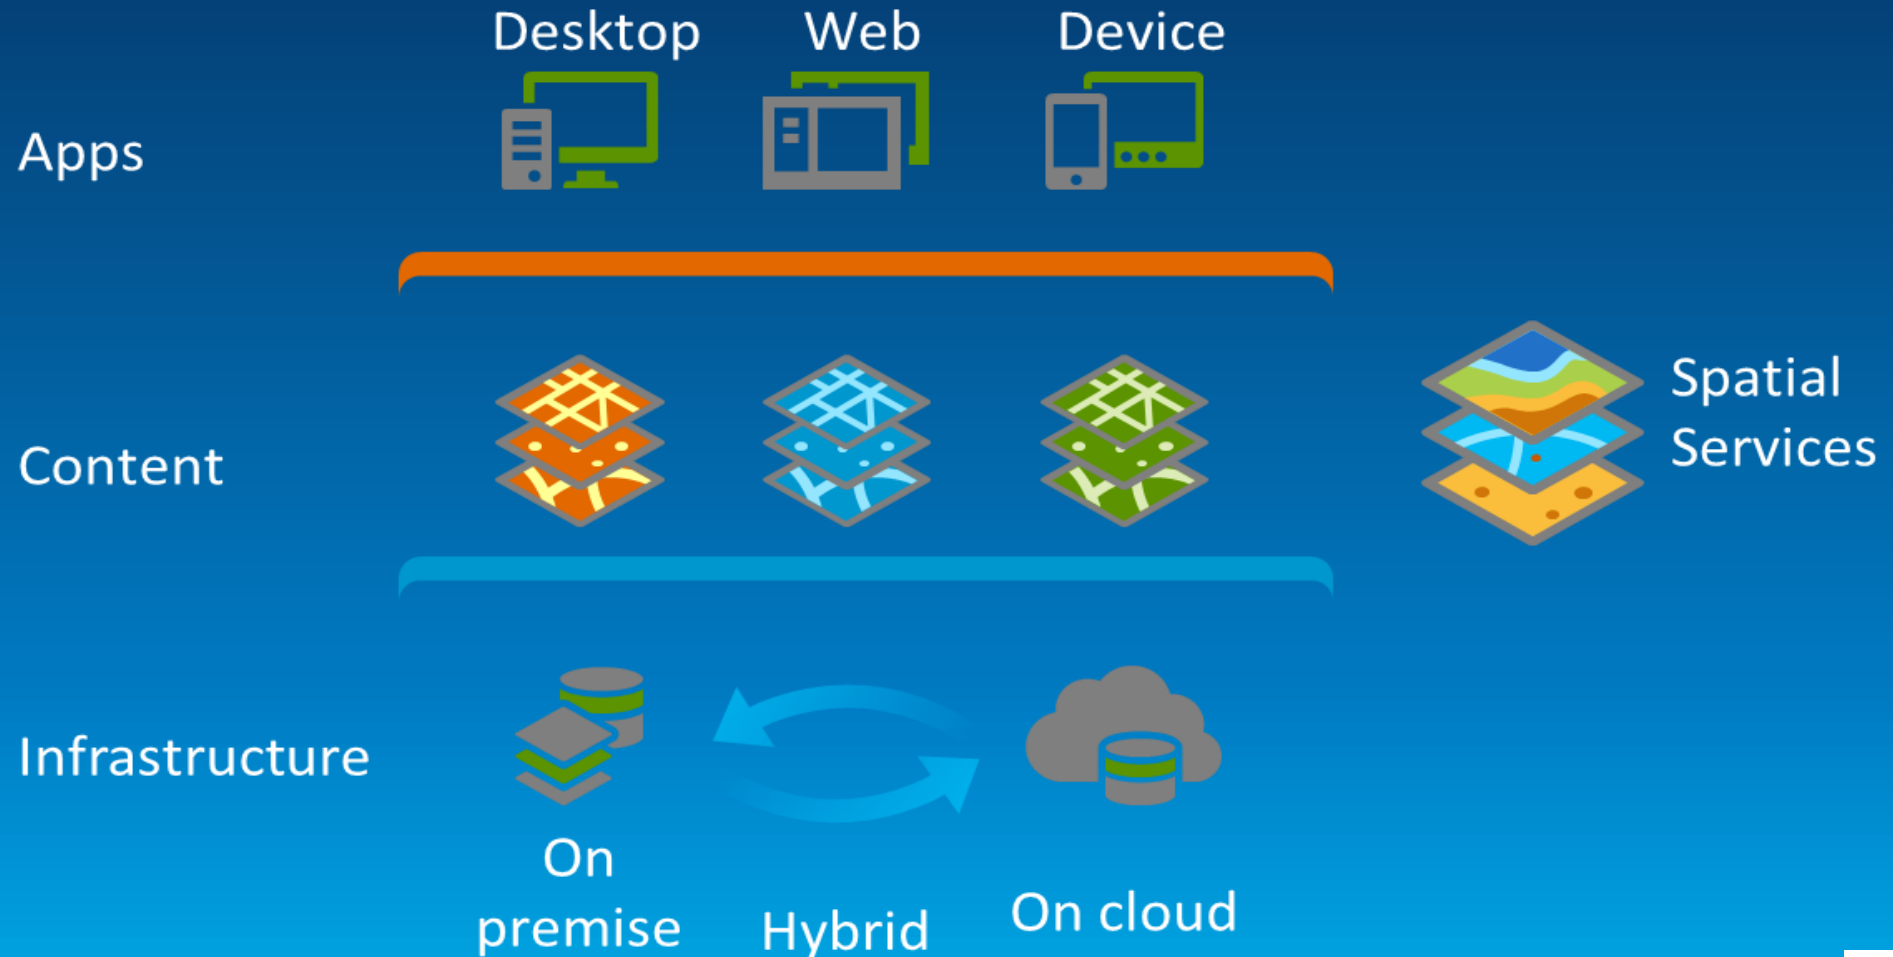

• The central INSPIRE Portal services for:

- ✓ Discovery
- ✓ View
- ✓ Download
- ✓ Transformation

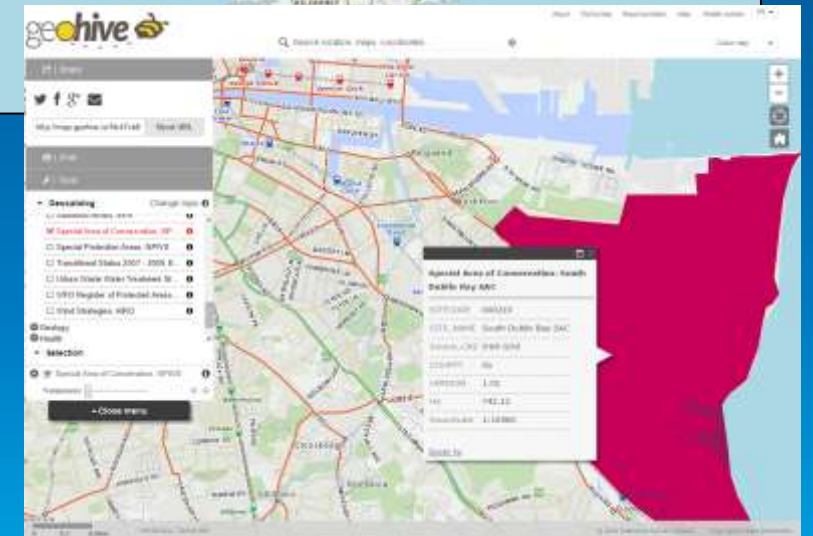

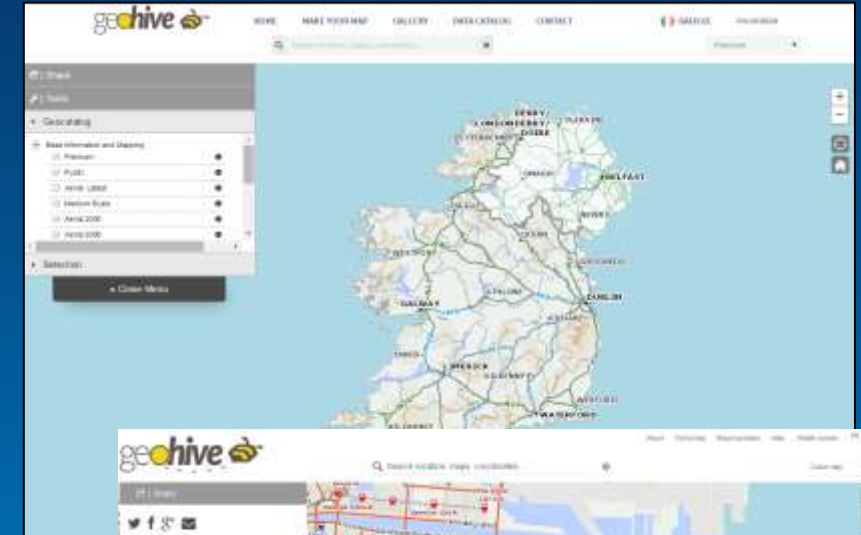

# Developing Ireland's NSDI Platform

# Ireland's NSDI – “GeoHive”

- Single catalogue of published data sets
- Sharing and collaboration
- Data driven with INSPIRE as a subset
- Geo-processing and spatial analysis
- App development

# Geoportal Vs GeoHive

Geoportal	GeoHive
Log in	No log in
INSPIRE Metadata format only	INSPIRE + Other Metadata formats
INSPIRE data themes	Varied data themes including Open Data
Single MapGenie Basemap	Multiple MapGenie, Aerial & Historical Basemaps
60+ Datasets	200+ Datasets
No Save/Share options	Save and Share options
Not mobile compatible	Mobile compatible

# Current Strategic Initiatives

# 3D Point Cloud from image matching

Hasso  
Plattner  
Institut

# Automatic Product Generation

Rules-based Data  
Management Workflows

Cartographic  
Generalisation from  
1:1,000 to 1:1m scales

# Economic benefits

## Ireland's Geospatial Information Industry

Mapping, aerial imagery, height information, boundary data, historic maps, tourist & leisure maps

**Geospatial Information** puts the 'where' into business decisions. Where to find customers, to locate premises, to build property, infrastructure and networks.

**SUPPORTS THE EMPLOYMENT OF 3,087 PEOPLE**

**DIRECTLY EMPLOYS 1,677 PEOPLE**

The industry generated sales or output worth **€117.5m** in 2012

In 2012, the industry contributed over **€69.3m** in terms of Gross Added Value to the economy.

**€126 million**

In 2012, the sector had an economy-wide impact of **€126.4m**.

**€82 million**

The use of geospatial information is estimated to accrue annual savings of **€82m** in the public sector.

The estimated economic value of annual time saving generated through the use of geospatial information is **€279m**.

The use of **Geospatial Information** is estimated to generate competition benefits of **€104m**.

The industry spent a total of **€84.4m** on wages and salaries

Thank You

@Ordnanceireland
