OSKARI PLATFORM A COLLABORATIVE EFFORT TOWARDS BETTER MAP APPLICATIONS

INSPIRE GWF 2015

Timo Aarnio 26.5.2015

AGENDA

- What is Oskari?
- Users of Oskari
- History and roadmap
- Oskari Network

WHAT OSKARI /S...

- An Open Source package...
 - For creating embedded SAAS map clients in iframes onto other websites very efficiently – a Geospatial Application Engine
 - For setting up full-fledged Geoportals or Web GIS systems
 - For setting up advanced web-based tools, such as decisionmaking support services
- In all use cases you can utilize distributed SDIs like INSPIRE and ELF via standard OGC interfaces as well as other data sources

...AND WHAT OSKARI *IS NOT*

A Desktop GIS

- It is a Web GIS platform running under a web container, like Jetty

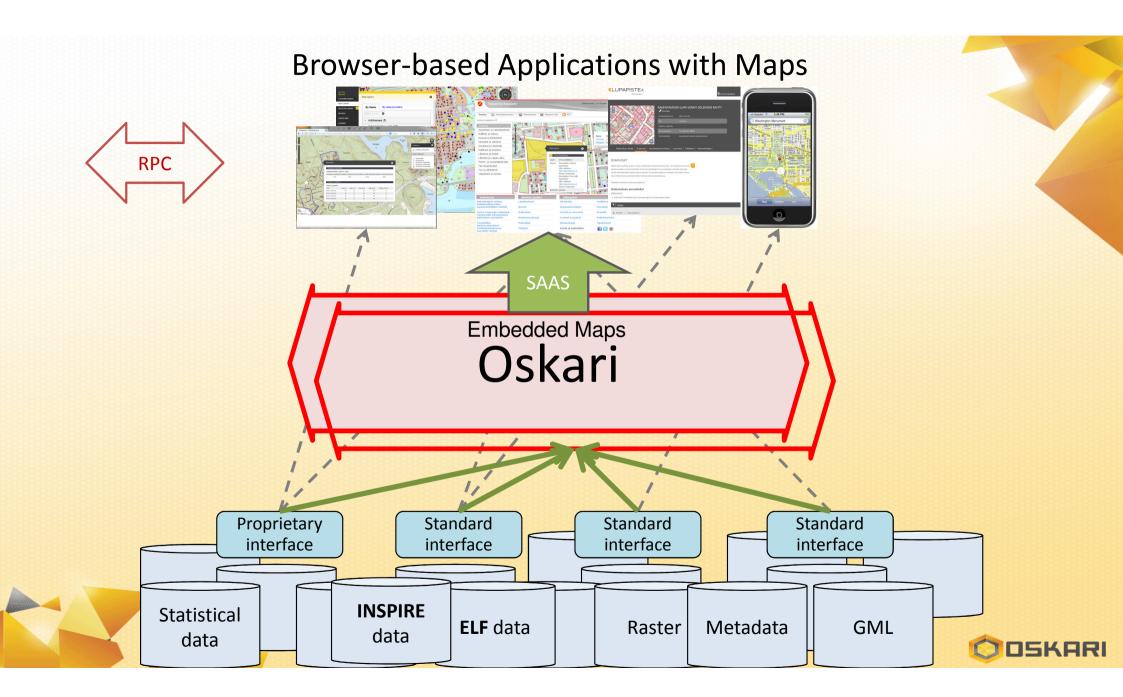

- A Readily available Cloud Service
 - Oskari can be set up in the cloud, or can be offered as a cloud service
- A tool for providing data APIs
 - The package includes GeoServer, but it is not the main function of Oskari
- A Metadata Catalogue

Skari does have a metadata search&show UI, works with CEGEKERI

WITH OSKARI YOU CAN E.G. ...

- Connect to and browse OGC and other data APIs, like ArcGIS REST
- Leverage INSPIRE and ELF harmonized SDI content
- Search for placenames, addresses and metadata
- Define embedded map clients in just a few minutes to be used as SAAS in an iframe on other websites
- Upload your own file-based data and use them together with data sources from the SDI
- Draw points/lines/polygons on user-defined map layers
- Visualize statistical data as thematic maps (to be extended)
- Perform spatial analysis (beta)

USERS OF OSKARI

- European Location Framework <u>Showcase</u>
 <u>App</u>
- Arctic SDI <u>Geoportal</u>
- Finnish National eGovernment services
- National Land Survey of Finland eServices
- City of Tampere <u>Map Service</u>, <u>Citizens'</u> <u>Services Map</u> + <u>many more</u>
- The <u>Regional Council</u> of Southwest Finland
- Statistical data service "Liiteri" for the

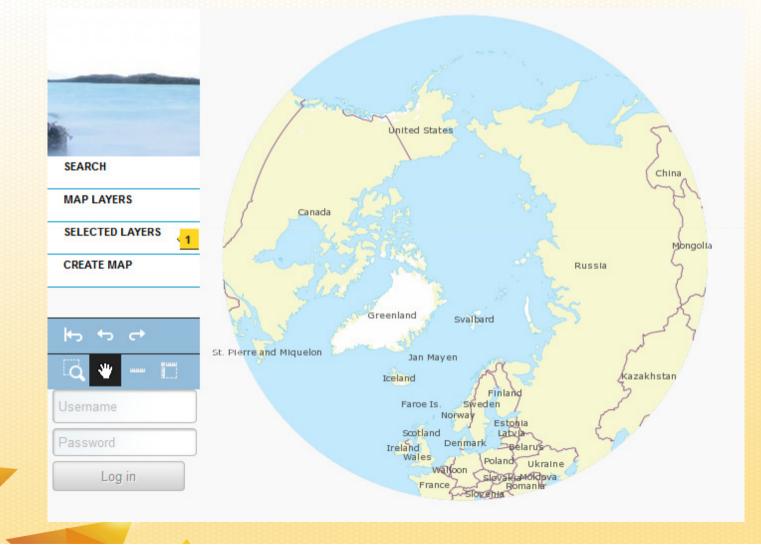

Finnish Transport Agency <u>data download</u> <u>service</u>

- Permit Services for Municipalities (<u>Lupapiste</u>)
- Unemployment Services Finland <u>mol.fi</u>
- Finnish Transport Security Agency <u>boat</u> registration

CASES: ELF SHOWCASE APP

2008 2009 2	2010 2011 2012 2013 2014 2015 2016 2017

ROADMAP 2015

- Upgrade to OpenLayers 3
- Responsive/adaptive embedded maps, extension of RPC API
- Vector layers on maps
- UI-configurable WFS-T support
- UI-configurable Search tool
- WMS-T time series support
- More data sources for statistical data
- Easier version upgrade process
- + Many more features to be integrated from other projects using and developing Oskari

PRODUCT LIFECYCLE MANAGEMENT

- A product lifecycle management plan is in place for Oskari
- Oskari Network steering committee governs the software
 - Representatives from organizations and projects utilizing Oskari as well as two elected Network members
 - NLS Finland acts as the Coordinator of the Network
 - The steering committee working language is Finnish (for now..)

TISKORI

 Common funding is being gathered for Oskari core maintenance
