

# **Drivers for change**

**Bengt Kjellson**

**DG & CEO Lantmateriet, Sweden**

**Wednesday May 25, 2016**

**GWF, Rotterdam**

# **We are facing huge societal changes**

**Digitalisation is maybe the single largest change affecting us today – but there are other changes taking place as well**

# On the road to the perfect storm!

- Faster changes in society
- Globalisation
- Individualisation
- Demography
- Migration

## Low quality and productivity

- Construction/housing
  - Transport (road and railway)
  - Health care (deaths because of malpractice)
  - 10 % get infections after surgery
  - Waiting times constant
  - 10 % of pupils do not meet basic requirements
  - Drug addicts continue using
  - Patients/users fall between organisational responsibilities
  - IT-systems fail
- 
- And this has been going on for decades!

# Political discussions do not solve the problems

- Private – public
- Central – local government
- More – less resources
- More – fewer regions/municipalities
- Bigger – smaller classes
- Grades later or earlier
- Laws, rules and policies
- Freedom of choice

# And everything relates to location

- Geostatistics
- Movement
- Indoor geospatial information
- Real-time data

## Two examples that might change a lot!

- Geo Life Region Gävleborg – Future Position X
- Autonomous/self-driving cars

# Thank you for your attention!
