Importance of geospatial information in fiber network build out
Main point of discussion

Geospatial Information and Systems are helping Tier 1’s:

- Gain an advantage over competition
- Lower your cost of construction
- Decrease time to revenue
Where do I target?
Do I need to build/dig?
Do I need to build/dig?
Let’s say I do. How?

High Level Planning/Initial Design

Field Walking

Design Uplift

Permitting and Construction

As built / Inventory
Let’s say I do. How?
