

kadaster

*Kadaster provides certainty with transparency  
regarding  
ownership and the use of property and space.*

Digital twins are models of a certain reality

Digital twins become models that  
create a certain reality

# Artificial Intelligence!

Our AI algorithms are only as good as the data we used in the "training sets" to make the algorithms!

People contextualize, machines "know" only what is in the training dataset or what has been modeled

This makes AI algorithms and Humans often complementary to each other.....

# Augmented Intelligence!

# The future of our data is connected
