Geospatial for Net Zero
Streamlining technology | Enabling diverse teams | Achieving best results
Connecting People, Data, and Technology to transform the world’s infrastructure for all.
Atkins Geospatial

90+ Geospatial Professionals
- GIS Consultants
- Geomatics Specialists
- Software Developers
- Based around the UK and Bangalore

Staff:
- ISO BIM/GIS Working Group
- ICE Geospatial Engineering Panel
- IEMA Special Interest Group Member – digital delivery
- FME Certified Staff and Certified FME Trainer Status
- Funding CIRIA Research
- Funding PhD’s in Geospatial Science
Why use Geospatial for Net Zero?
Net Zero is a complex challenge requiring inputs from multiple sectors. Between these diverse concerns, location may be the only unifying factor.
Energy Strategic Masterplanning
Use data to focus on insights
Connect Issues to get more actionable insights
Use non-traditional data to understand behaviour
This results in meaningful sustainability outcomes
